Programm

Workshop 1 Anterior skull base

Location: TBL at NIFE, Stadtfelddamm 34, 30625 Hannover

Time: 8:00 – 13:00

Faculty: Henry W. Schroeder (Greifswald)
Sebastien Froelich (Paris, France)
Rüdiger Gerlach (Erfurt)
Christian Betz (Hamburg)
Thomas Lenarz (Hannover)

Course description:

The dissection course with live demonstration and lecture focuses on surgical approaches to the anterior skull base and its structures. The course will be guided by distinguished experts in this field from both ENT and neurosurgery. Some of them are working in teams together every day - the participants will benefit from the profound expertise.

Each participant has his own dissection place with cadaver specimen and endoscopic and microscopic equipment.

The master place allows to check the own demonstration with respect to the prepared steps done by the experts.

The use of the navigation system allows for anatomical orientation. The participants will have the possibility to do the surgical dissection on the skull base at the end of the course.

08:00 – 08:15	Welcome and Introduction	Lenarz
08:15 – 08:30	Lecture	Schroeder
08:30 – 10:00	Live Demonstration and Hands-on training	
10:00 – 10:15	Lecture	Froelich
10:15 – 12:00	Live Demonstration and Hands-on training	
12:00 – 12:15	Lecture	Gerlach
12:15 – 13:00	Live Demonstration and Hands-on training	

supported by Atmos, Storz, Medtronic, Fiagon, Olympus

Programm

Workshop 2 Lateral skull base

Location: TBL at NIFE, Stadtfelddamm 34, 30625 Hannover

Time: 13:00 – 18:00

Faculty: Jörg Schipper (Düsseldorf), Rolf Salcher (Hannover)
Translab: Jörg Schipper (Düsseldorf), Rolf Salcher (Hannover)
Middlefossa: Rudolf Hagen (Würzburg), Thomas Lenarz (Hannover)
Retrosig: Amir Samii & Vincenzo Paterno (Hannover), Ricardo Ramina (Curitiba, Brazil)

Course description:

The course offers the participants a unique experience for surgical approaches to the lateral skull base including live demonstration by distinguished experts in the field together with introductory presentations. The participants will have each one dissection place fully equipped for the hands-on training under the supervision of the experts.

A master station allows the participants to check the desired anatomical steps with in between breaks and demonstrations and the use of new navigation for anatomical orientation.

The attendees will be able to perform the 3 major surgical approaches to the lateral skull base on their own.

13:00 – 13:15	Welcome and Introduction	Lenarz
13:15 – 13:30	Translab Approach	Schipper, Salcher
13:30 – 15:00	Live Demonstration and Hands-on training	
15:00 – 15:15	Middlefossa	Hagen, Lenarz
15:15 – 16:45	Live Demonstration and Hands-on training	
16:45 – 17:00	Retrosigmoidal Approach	Samii & Paterno, Ramina
17:00 – 18:00	Live Demonstration and Hands-on training	

supported by Atmos, Storz, Medtronic, Fiagon, Olympus
